USER SEGMENTATION ENGINE: PRIORITIZATION MATRIX

P0: CRITICAL PATH

SEGMENT 1: ACTIVE SAVERS

REVENUE ENGINE

PROFILE: 22-30 yr Urban Pro / 25-35 UPI txns/mo

BEHAVIOR: Opens 3-4x/week / 'Piggy Bank' Model

RISK: Confusion on Gold Value vs. Deposits

IMPACT: ₹60-80 Cr Annually (60-70% of Base)

SEGMENT 4: NEW USERS

ONBOARDING RISK

PROFILE: 100% of Signups / <30 Days Tenure

BEHAVIOR: 3-8 Round-ups / 'Try & See' Mode

RISK: Panic at Auto-Debit (Day 7-14)

IMPACT: ₹40-60 Cr Annually (Prevent 10-15% Churn)

P1: GROWTH OPTIMIZATION

SEGMENT 2: MODERATE SAVERS

GROWTH POTENTIAL

PROFILE: Semi-urban / 15-20 UPI txns/mo

RISK: Doubt (Returns vs. FD)

IMPACT: ₹20-30 Cr Annually

P2: WIN-BACK / DORMANT

SEGMENT 3: DORMANT SAVERS

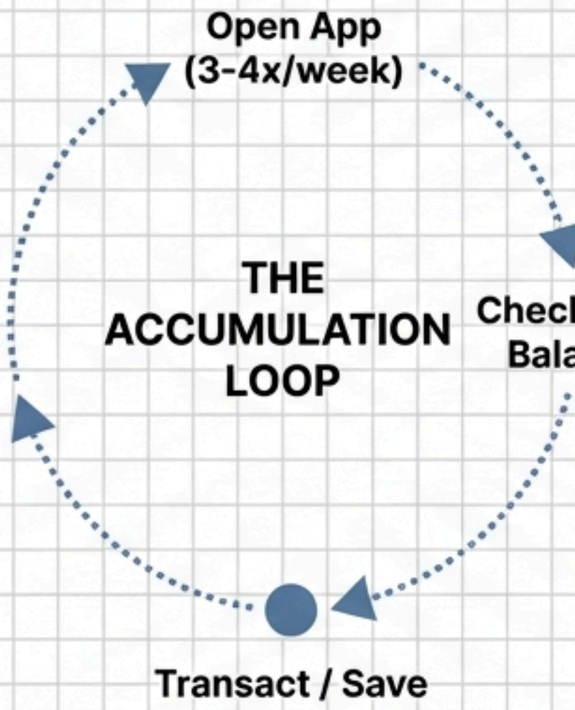
LOST OPPORTUNITY

PROFILE: Inactive 90+ Days

RISK: Trust Broken / Quiet Exit

IMPACT: ₹15-25 Cr Annually (Low ROI)

SEGMENT 1 (P0): REVENUE ENGINE FAILURE POINT



TRUST-BREAKDOWN EVENT

TRIGGER: WITHDRAWAL SHOCK

```
INPUT (EXPECTATION):   ₹10,000
OUTPUT (REALITY):       ₹9,200
-----------------------------
DELTA:                 -₹800 (Panic)
```

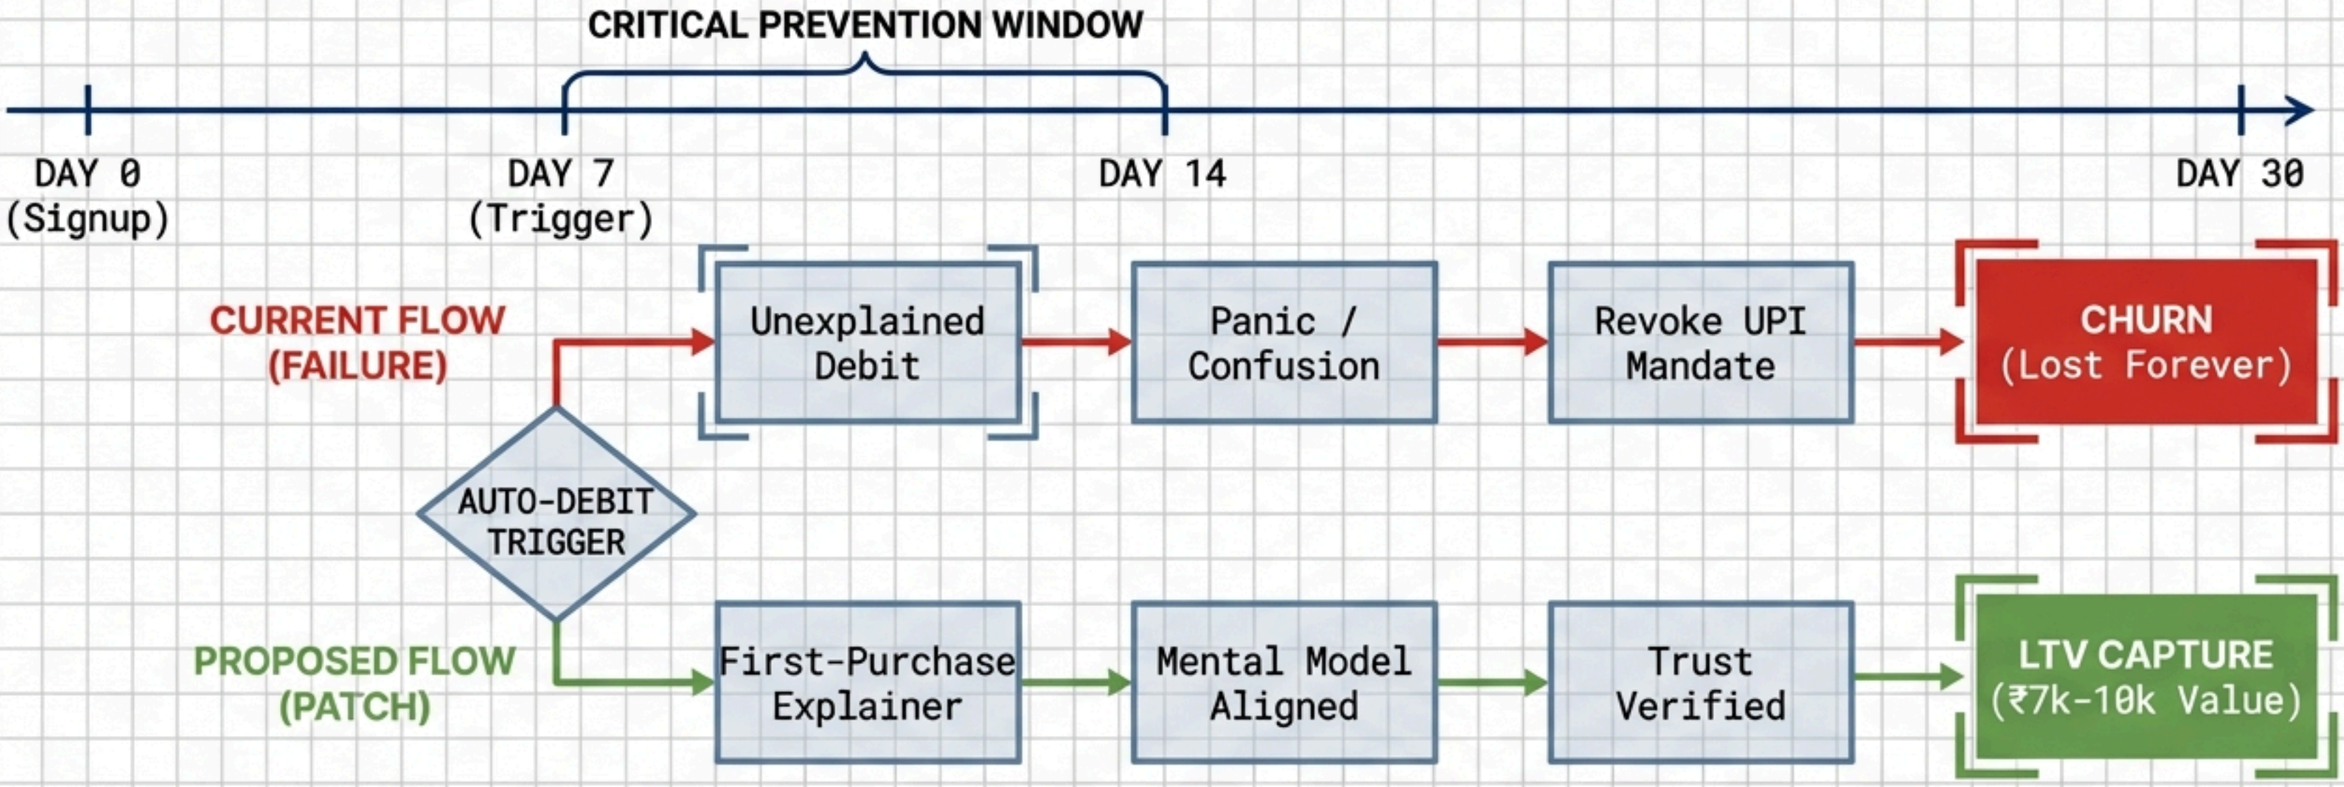
User Logic: "Where is my money? Is this safe?" -> Google Search -> Negative Reviews.

SYSTEMIC CHURN

Ejection from ecosystem.

IMPACT DIAGNOSTIC: High. Users exhibit high intent to save, but pricing opacity forces system ejection.

SEGMENT 4 (P0): NEW USER LOGIC PATCH

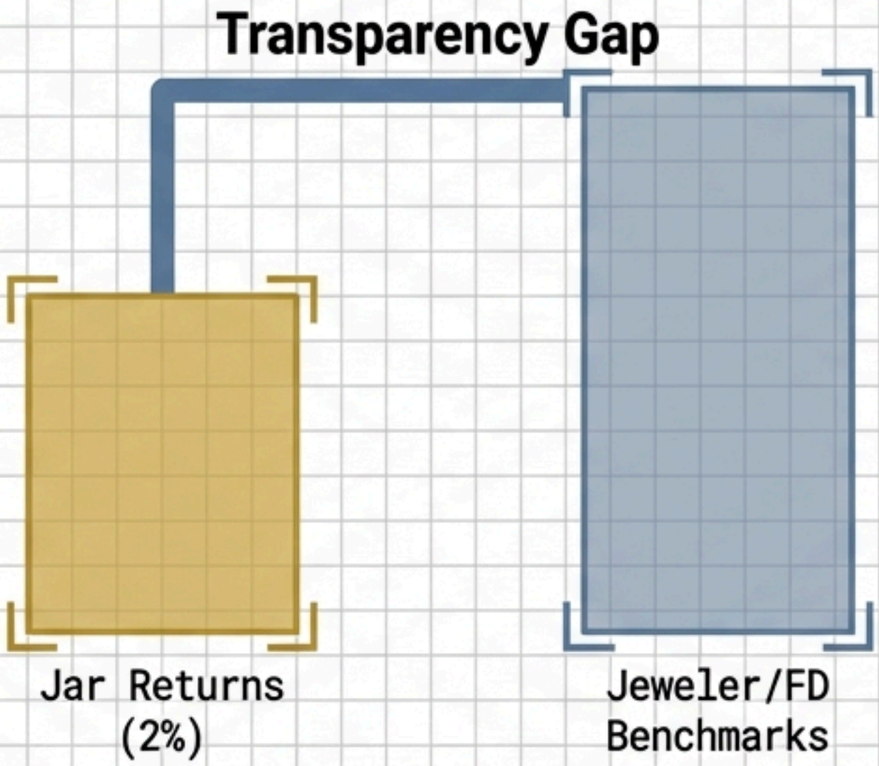


ENGINEERING NOTE: Preventing early churn is 10x more valuable than reactivating dormant users.

DEPENDENCY ROADMAP: P1 & P2 STRATEGY

SEGMENT 2 (P1) - VALIDATION STRATEGY

Objective: Convert Doubt to Confidence



Users ask 'Am I earning?'. Fix: Benchmark performance against traditional alternatives.

SEGMENT 3 (P2) - WIN-BACK DEPENDENCY

Objective: Resurrection

```
IF (Transparency_Features == LIVE) {
   Trigger: Win_Back_Campaign;
} ELSE {
   Action: DO_NOT_CONTACT;
}
```

Cannot resurrect dead users without new value prop. Dependency: Wait for Transparency Features.
