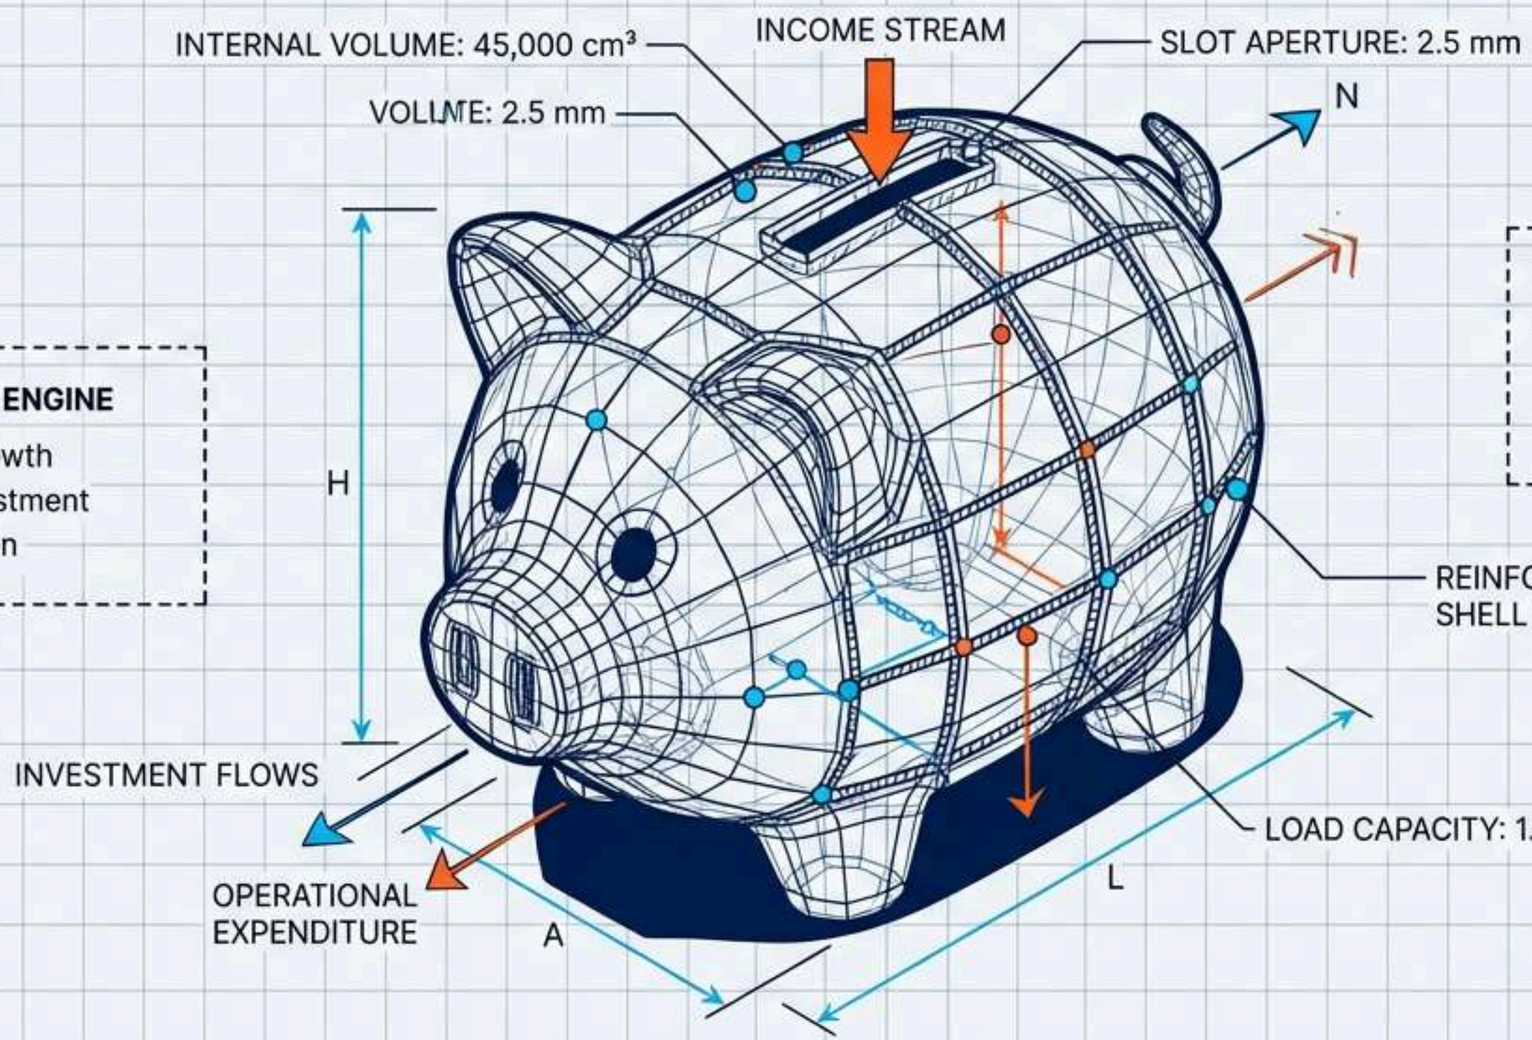
JAR REVENUE ARCHITECTURE: SYSTEM SPECIFICATION FY25

Analysis of Compounding Engines, Vertical Integration, and Unit Economics.



COMPOUNDING ENGINE

- Algorithmic Growth
- Interest Reinvestment
- Tax Optimization

VERTICAL INTEGRATION STACK

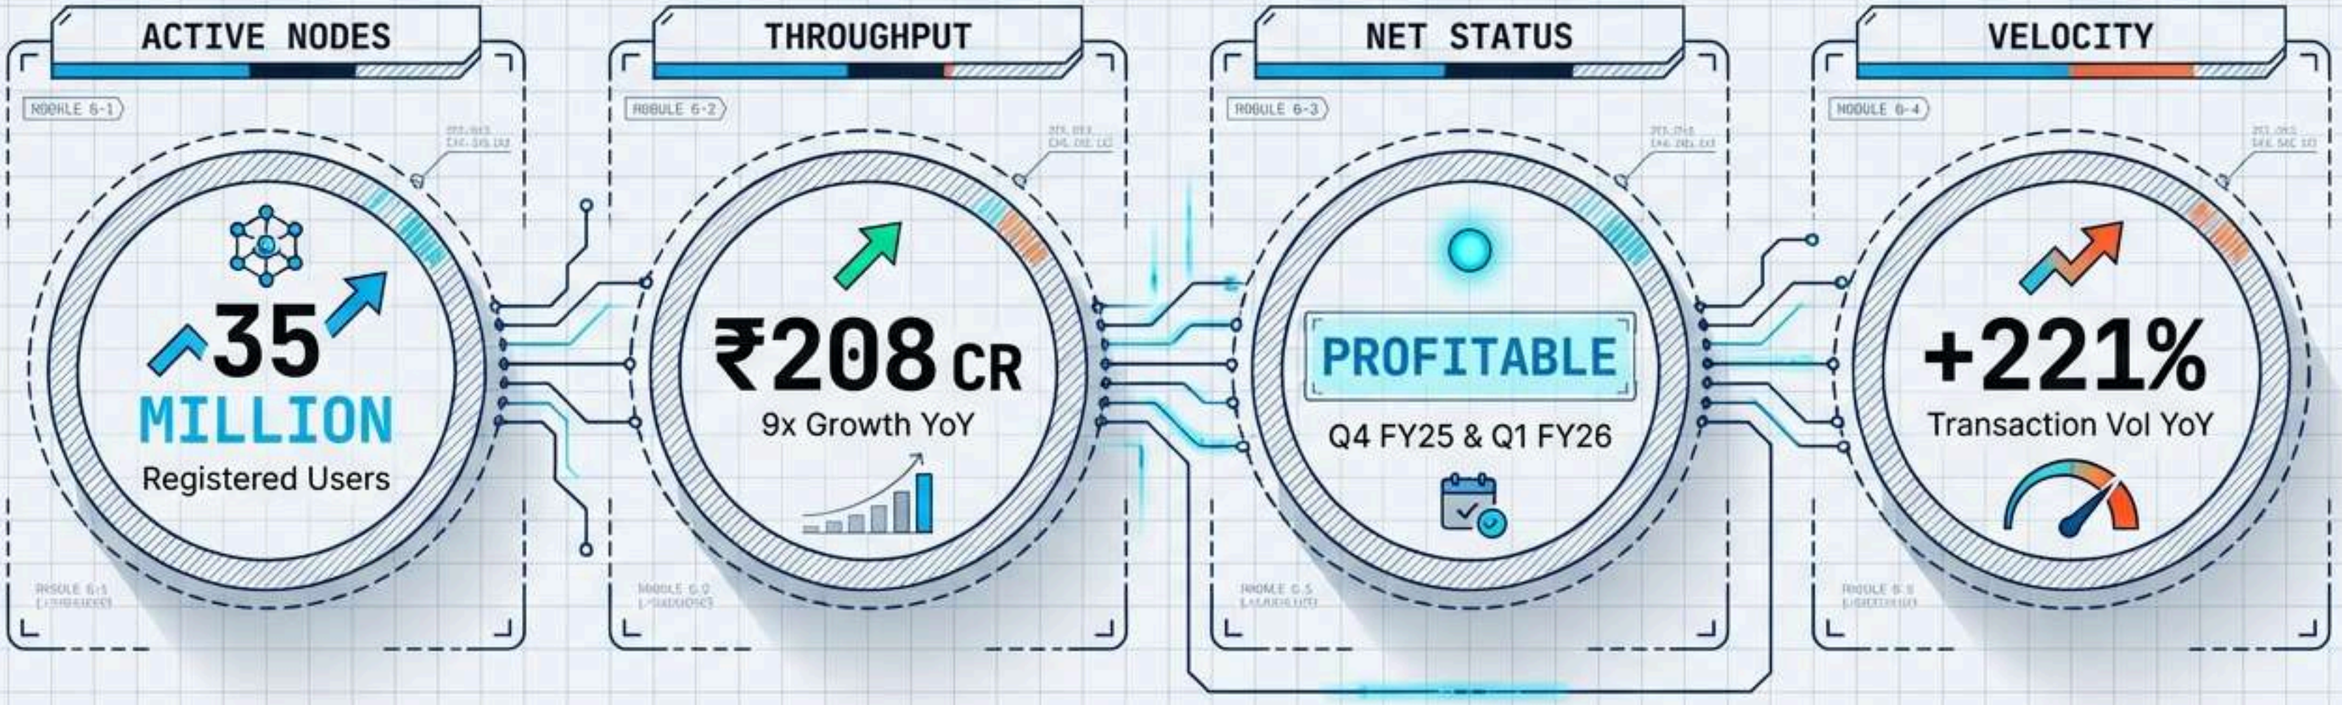
- In-house Payment Gateway
- Data Analytics Platform
- Direct Lending

CONFIDENTIAL//
PROJECT CODE: FY25-PROFIT

Status: Profitable | Version: 2.0 | Scale: 35M Users

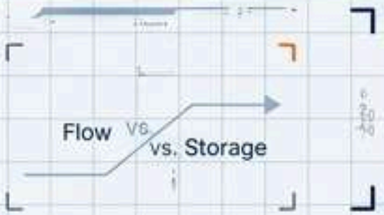
Jar Explainer Series

SYSTEM TELEMETRY: THE MICRO-TRANSACTION PARADOX

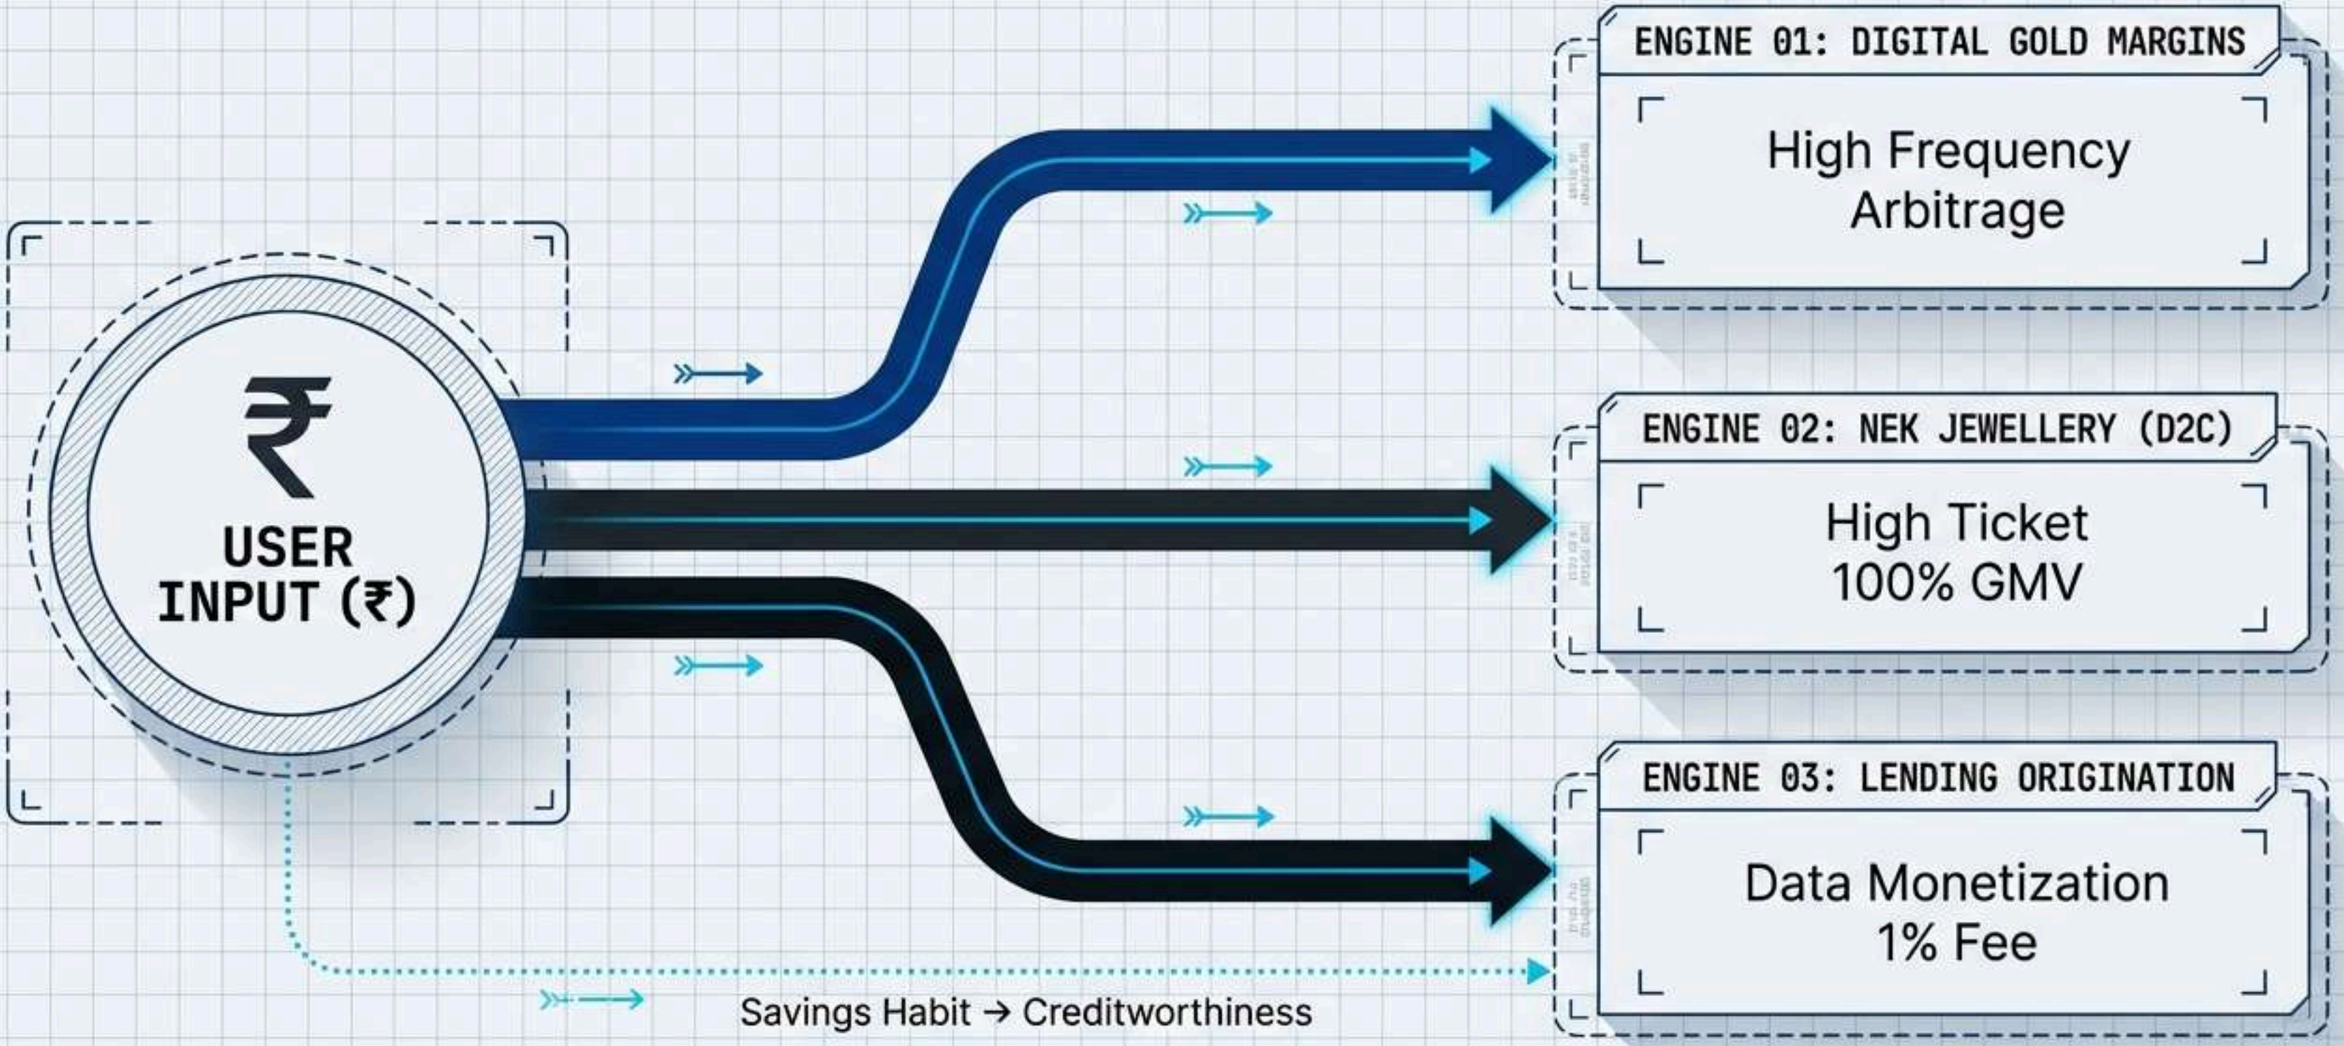


TECHNICAL ANOMALY REPORT

The core anomaly: Generating massive aggregate revenue from ₹10-50 average ticket sizes by capturing value on flow rather than storage.



TOPOLOGY: THE THREE COMPOUNDING ENGINES



ENGINE 01: THE ROUND-UP INGESTION LOGIC

$$S = (10 - (V \bmod 10)) \bmod 10$$

INGEST

Txn detected via Account Aggregator

COMPUTE

Modulo logic applied

TRIGGER

Auto-debit execution if Cumulative S >= ₹10

Frictionless Capture: High-frequency, low-value debits mirror the physical habit of dropping coins in a jar.

MONETIZATION PROTOCOL: WHOLESALE-RETAIL ARBITRAGE

INPUT

User Payment: ₹100

JAR BULK PROCUREMENT (WHOLESALE)

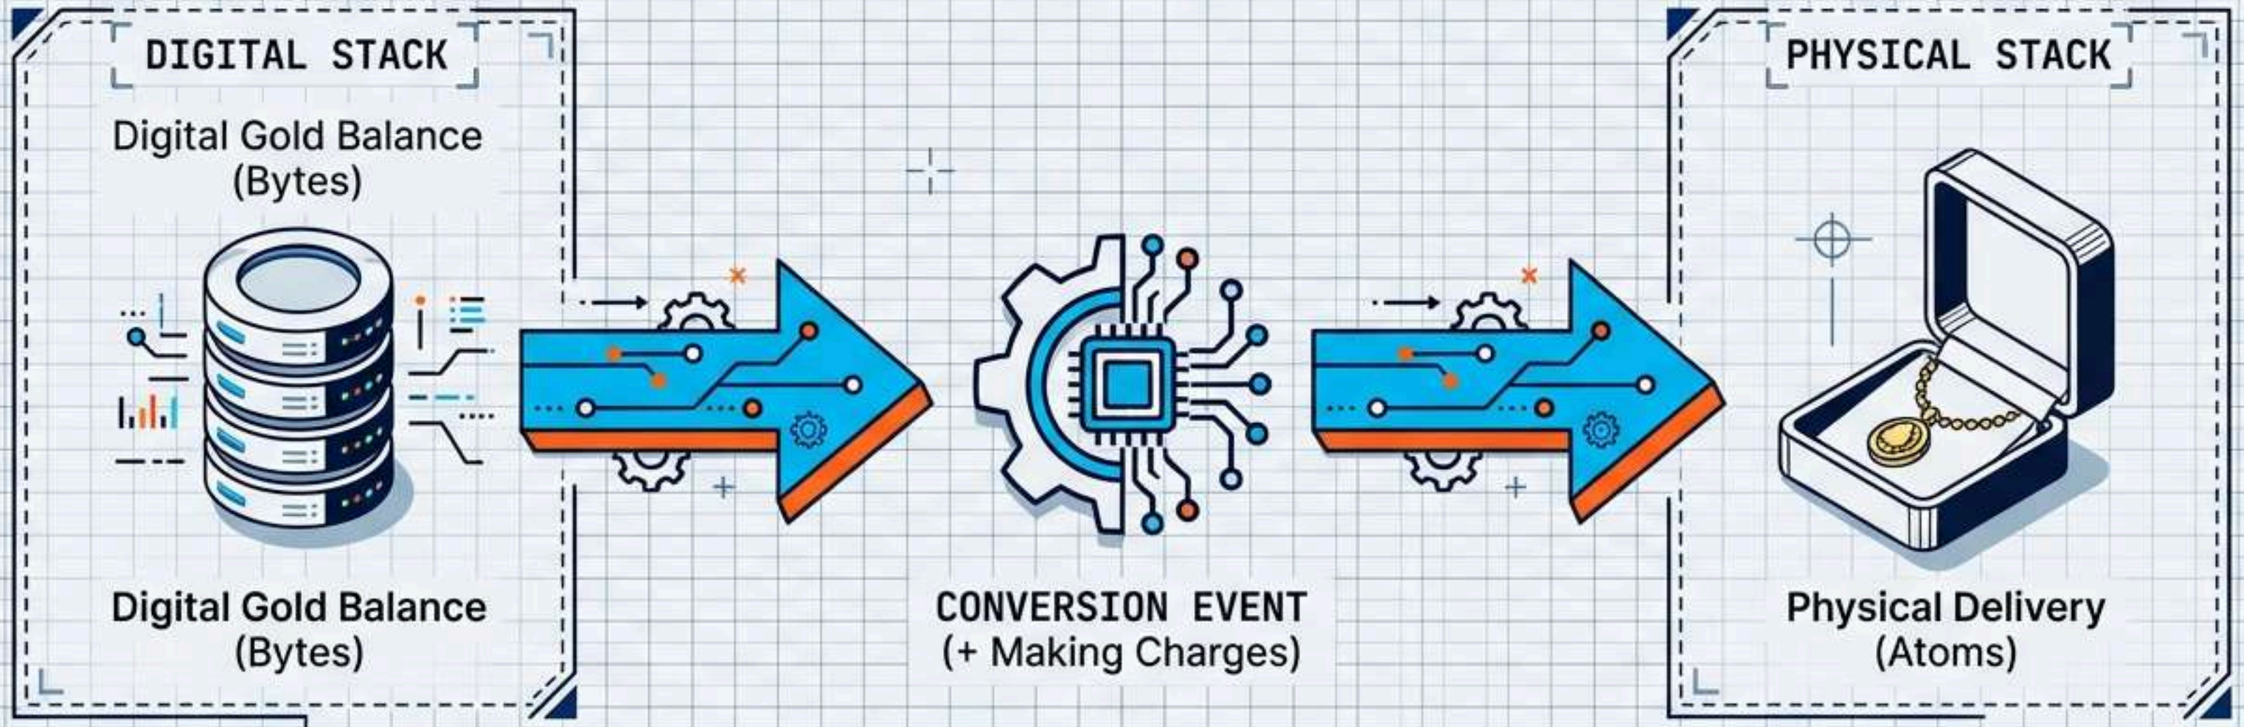
- **Gold Price:** Retail Rate (includes ~2-3% spread)
- **Cost Basis:** Wholesale Rate (Bulk from MMTC)

CAPTURED MARGIN

~₹2.00
(Estimated)

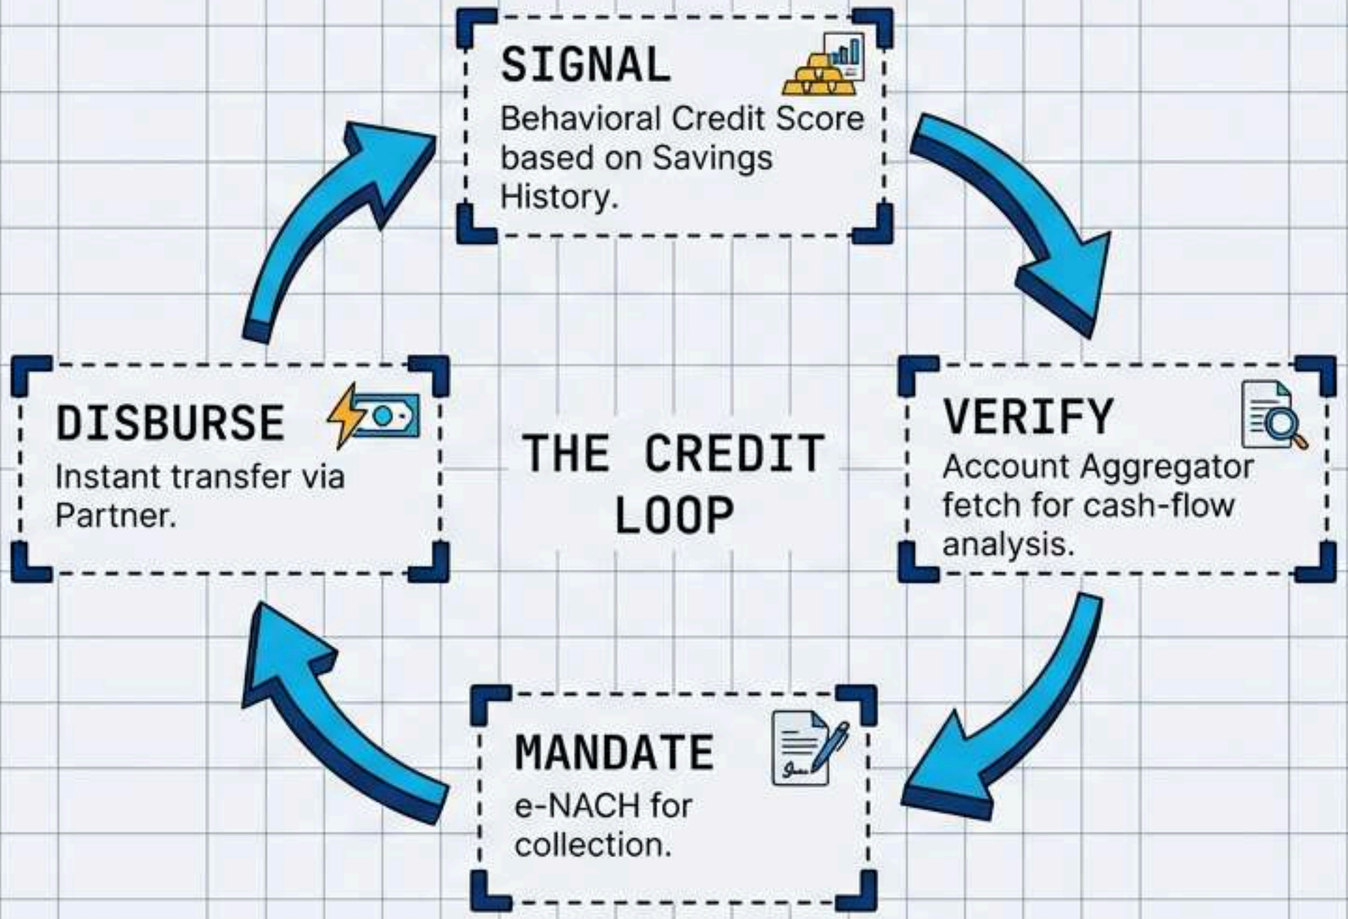
Volume Strategy: Aggregating millions of ₹10 requests allows sourcing at wholesale rates. Value is captured on the buy-side spread.

ENGINE 02: THE MATTER CONVERTER (NEK JEWELLERY)



RUN RATE:	₹100 Cr (Achieved in 8 months)
CONTRIBUTION:	~40% of Corporate Revenue
IMPACT:	Revenue Recognition shift from Margin-Only to Full GMV

ENGINE 03: THE CREDIT LOOP (FINANCIAL ORIGINATION)

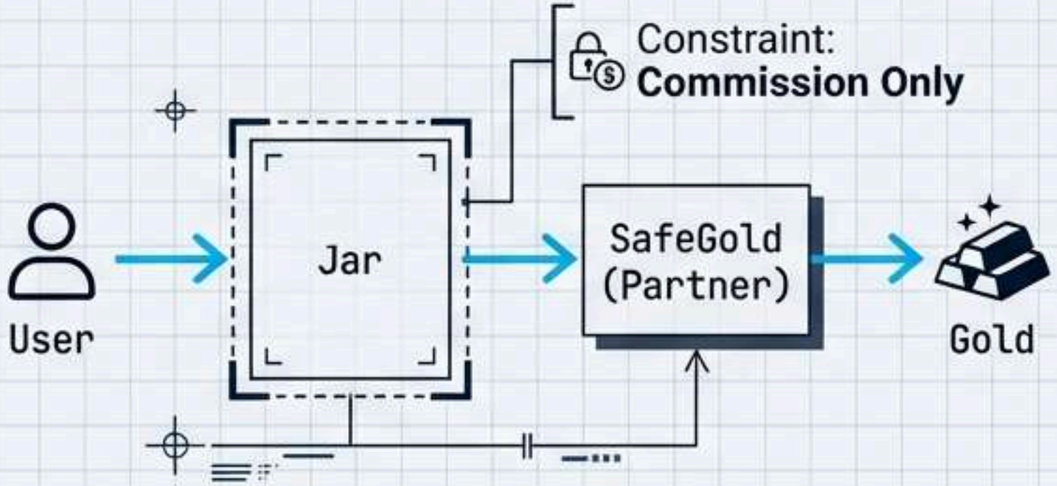


Revenue Model: Risk-Free Distribution.

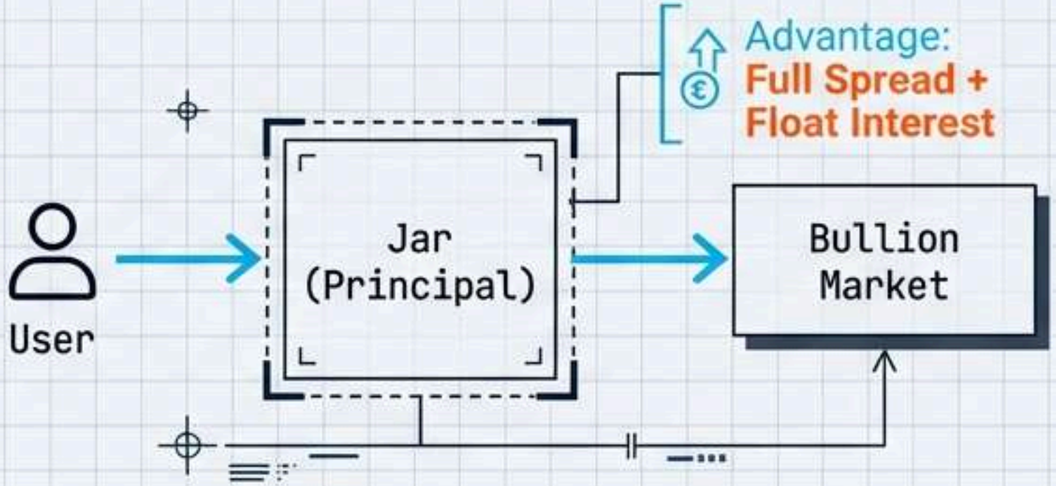
Jar earns ~1% origination fee. Zero balance sheet risk.

SYSTEM UPGRADE: THE VERTICAL INTEGRATION SHIFT

LEGACY ARCHITECTURE (DISTRIBUTOR)

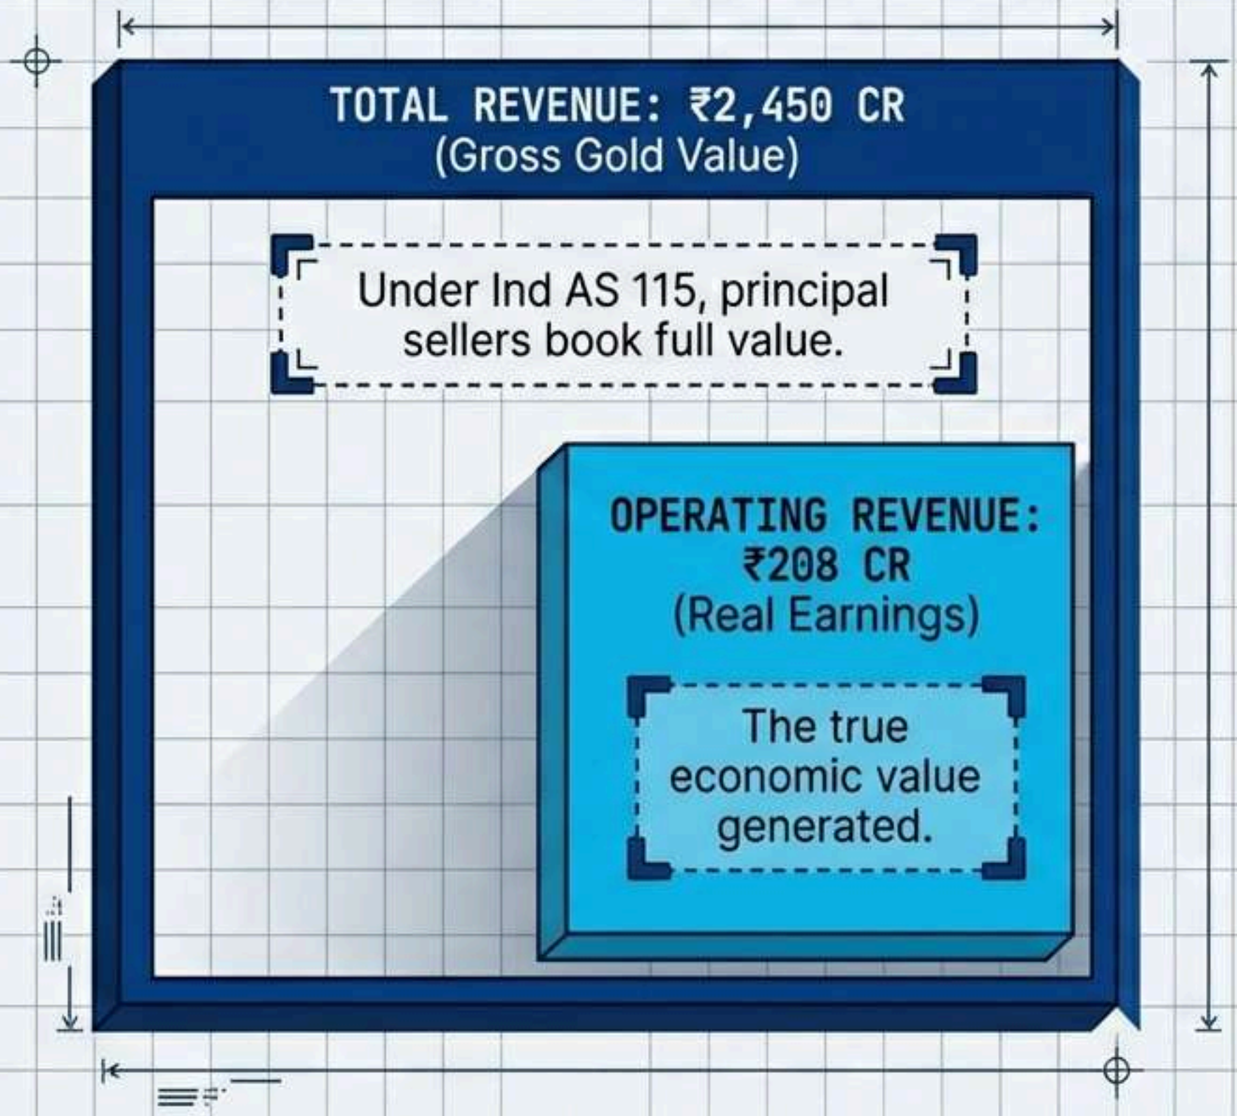


MODERN ARCHITECTURE (PRINCIPAL)



Transition from Agent to Principal architecture allows control over hedging, quality assurance, and margins.

ACCOUNTING REFACTOR: OPERATING VS. TOTAL REVENUE



REV. DIAGRAM

SCALE: VARIABLE

FY24 Operating Rev:

₹49 Cr

SCALE: ANTER

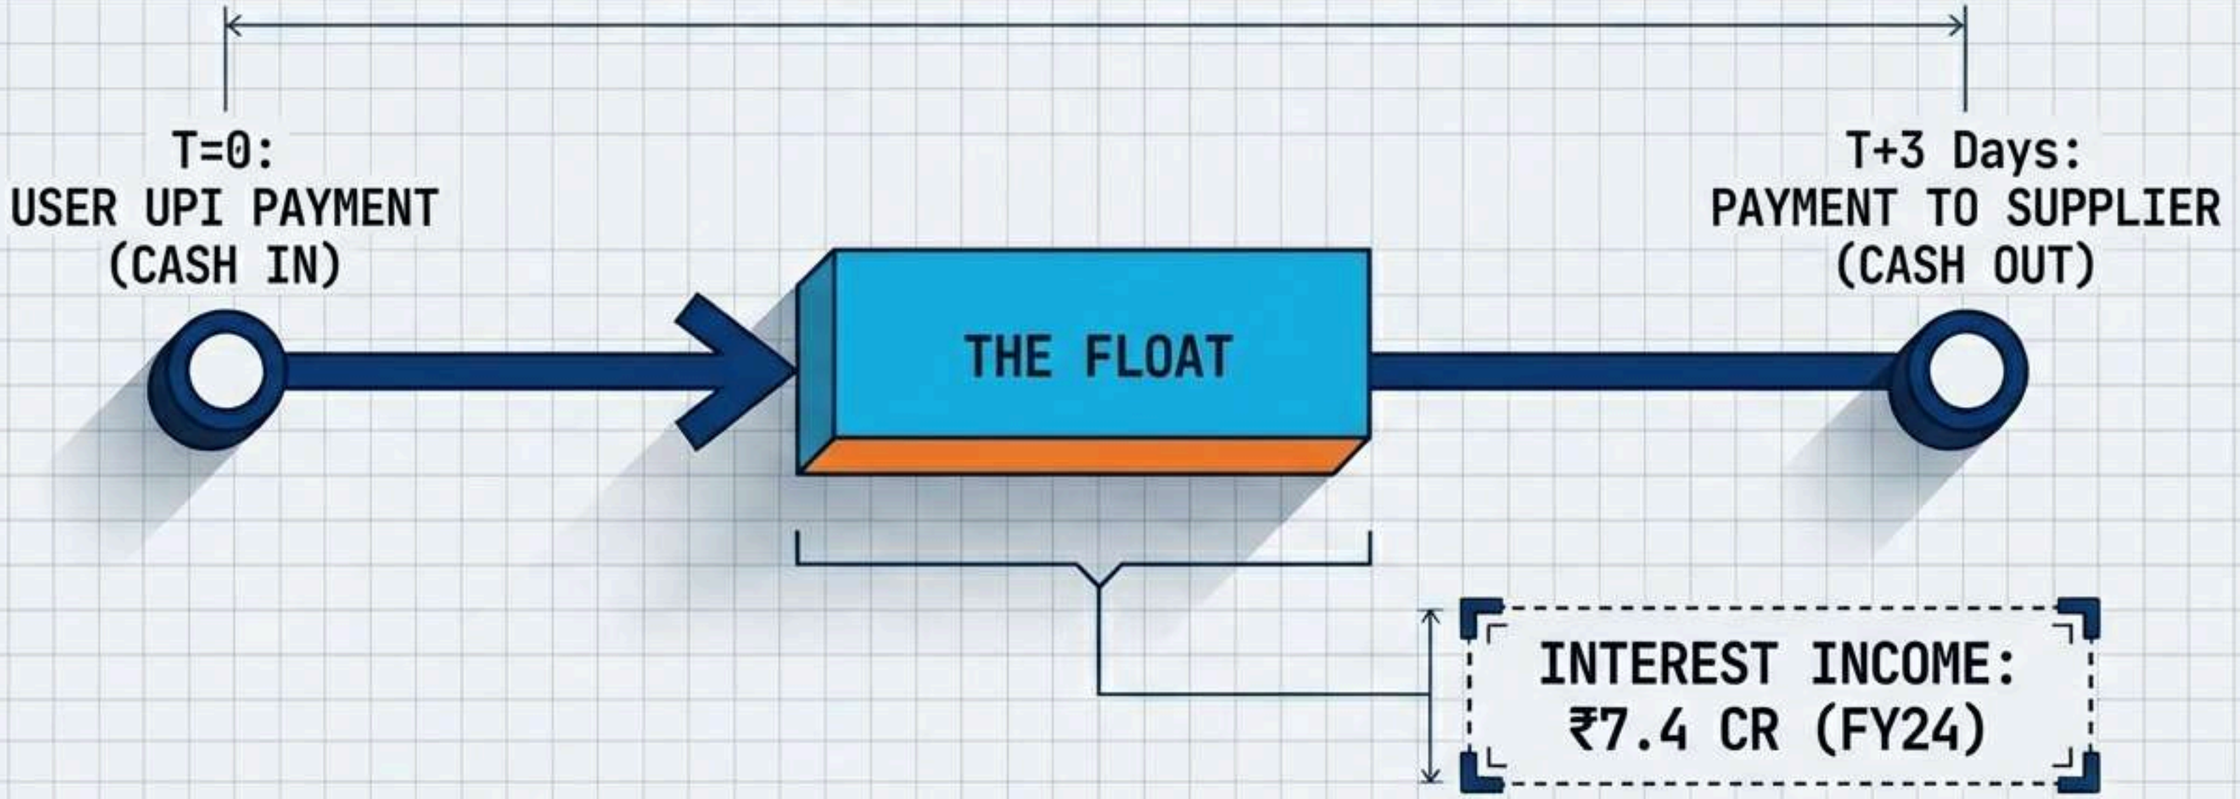
FY25 Operating Rev:

₹208 Cr ↑

(9x Growth)

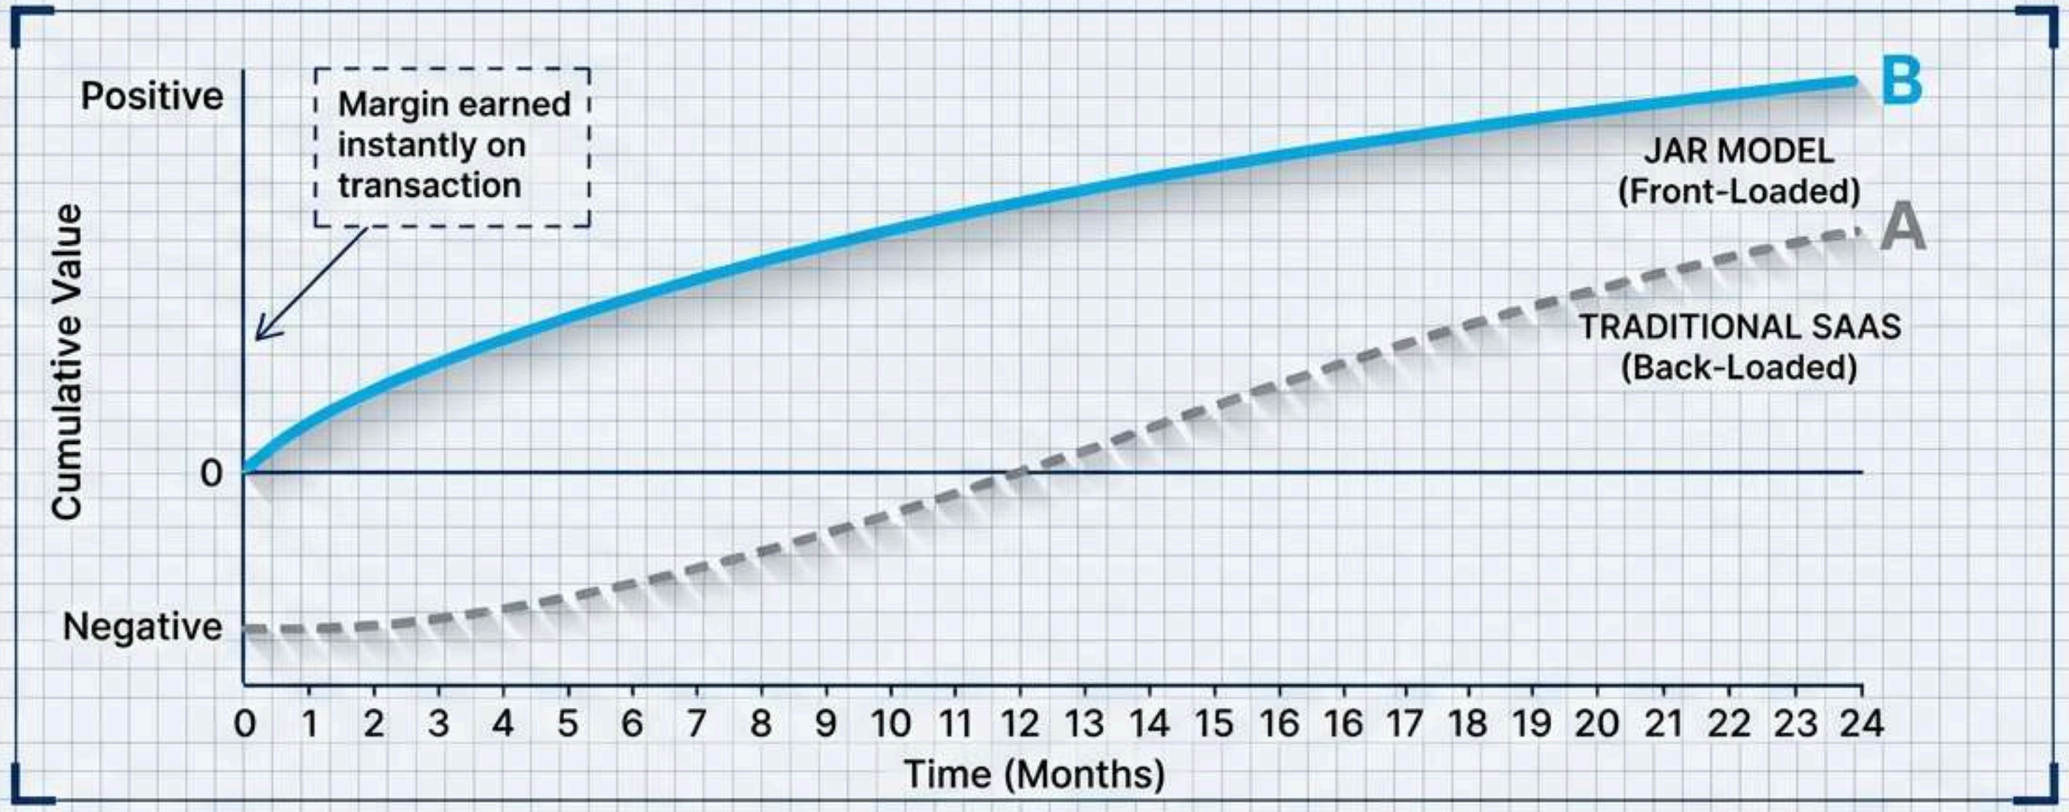
Jar Explainer Series

SUB-SYSTEM: NEGATIVE WORKING CAPITAL CYCLE



Money hits Jar's account instantly, but vendors are paid later. This creates a float that generates interest income, effectively subsidizing operations.

STRESS TEST: THE CHURN PARADOX



Revenue is captured at the Input, not the Output. Even if a user churns at Month 6, the margins from Months 1-5 are banked and irreversible.

EFFICIENCY METRICS: CAC & PAYBACK ANALYSIS

CAC: <₹150

(Industry Avg: ₹500+)

PAYBACK PERIOD:

<90 Days

Marketing Spend cut by 57% in FY24 while revenue grew 5.6x. Organic flywheel driven by 'Gold' cultural affinity.

LOAD BALANCING: USER SEGMENTATION ECONOMICS

ACTIVE SAVERS

- High Frequency
- Generates Gold Margin + Jewellery + Loans

NEW USERS

- High Velocity
- Break-even by Month 2

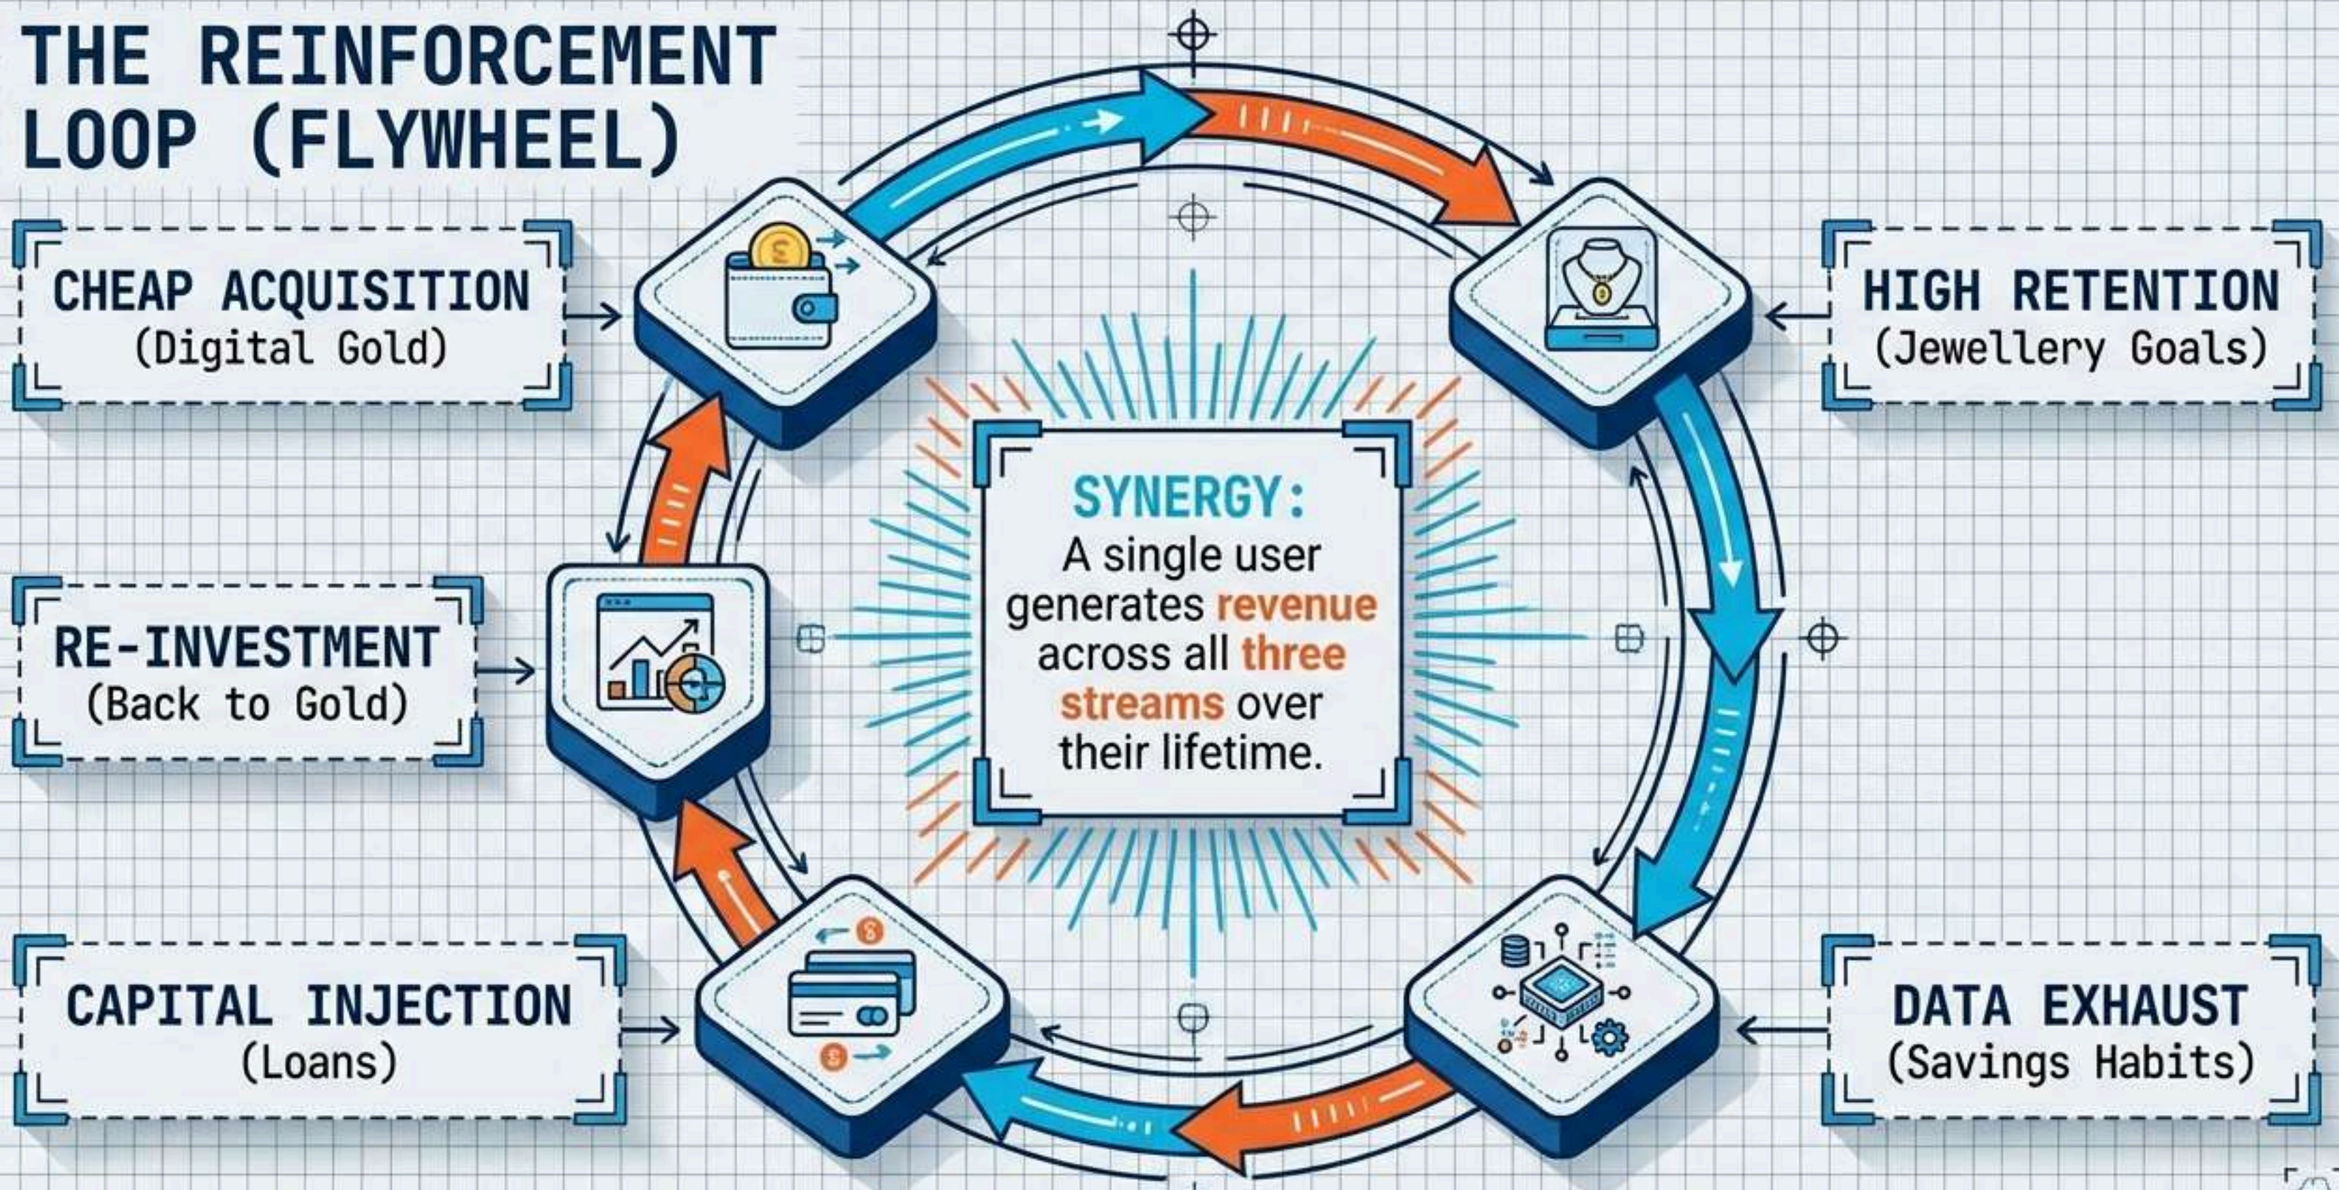
⚠ Risk of Early Churn

DORMANT USERS

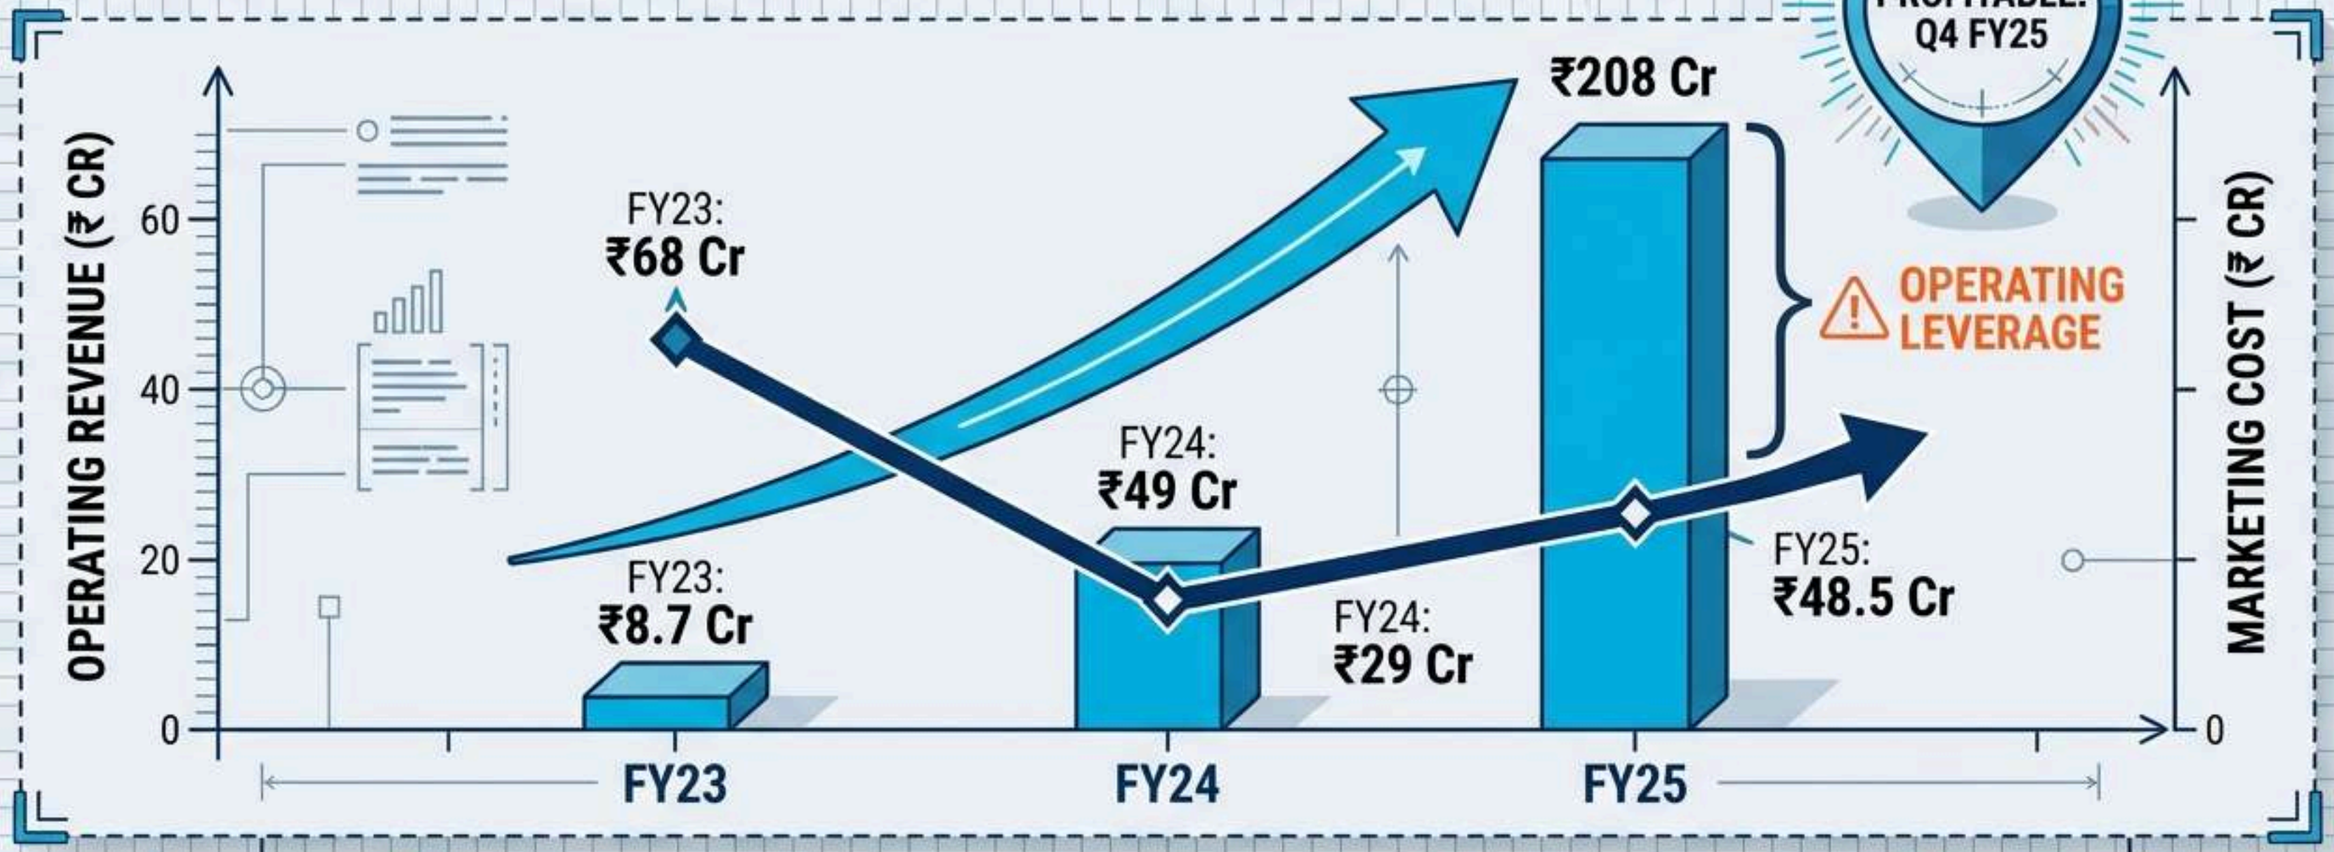
- Zero Active Revenue
- Zero Maintenance Cost
- Asset Already Funded

Dormant users hold gold already paid for. No recurring cost to maintain account. Re-activation potential = **Pure Profit**.

THE REINFORCEMENT LOOP (FLYWHEEL)



TRAJECTORY: THE CONVERGENCE TO PROFITABILITY



Revenue grew 4.2x while employee costs grew only 4%.

CORE INTEGRITY: STANDALONE VS. CONSOLIDATED

STANDALONE CORE (INDIA)

Revenue:
₹186.56 Cr

Expenditure:
₹175.6 Cr

EBITDA:
+₹15.07 Cr

ADJUSTMENTS

ESOP Charges:
-₹14.6 Cr

Subsidiary/Expansion

CONSOLIDATED NET LOSS

-₹50.5 Cr

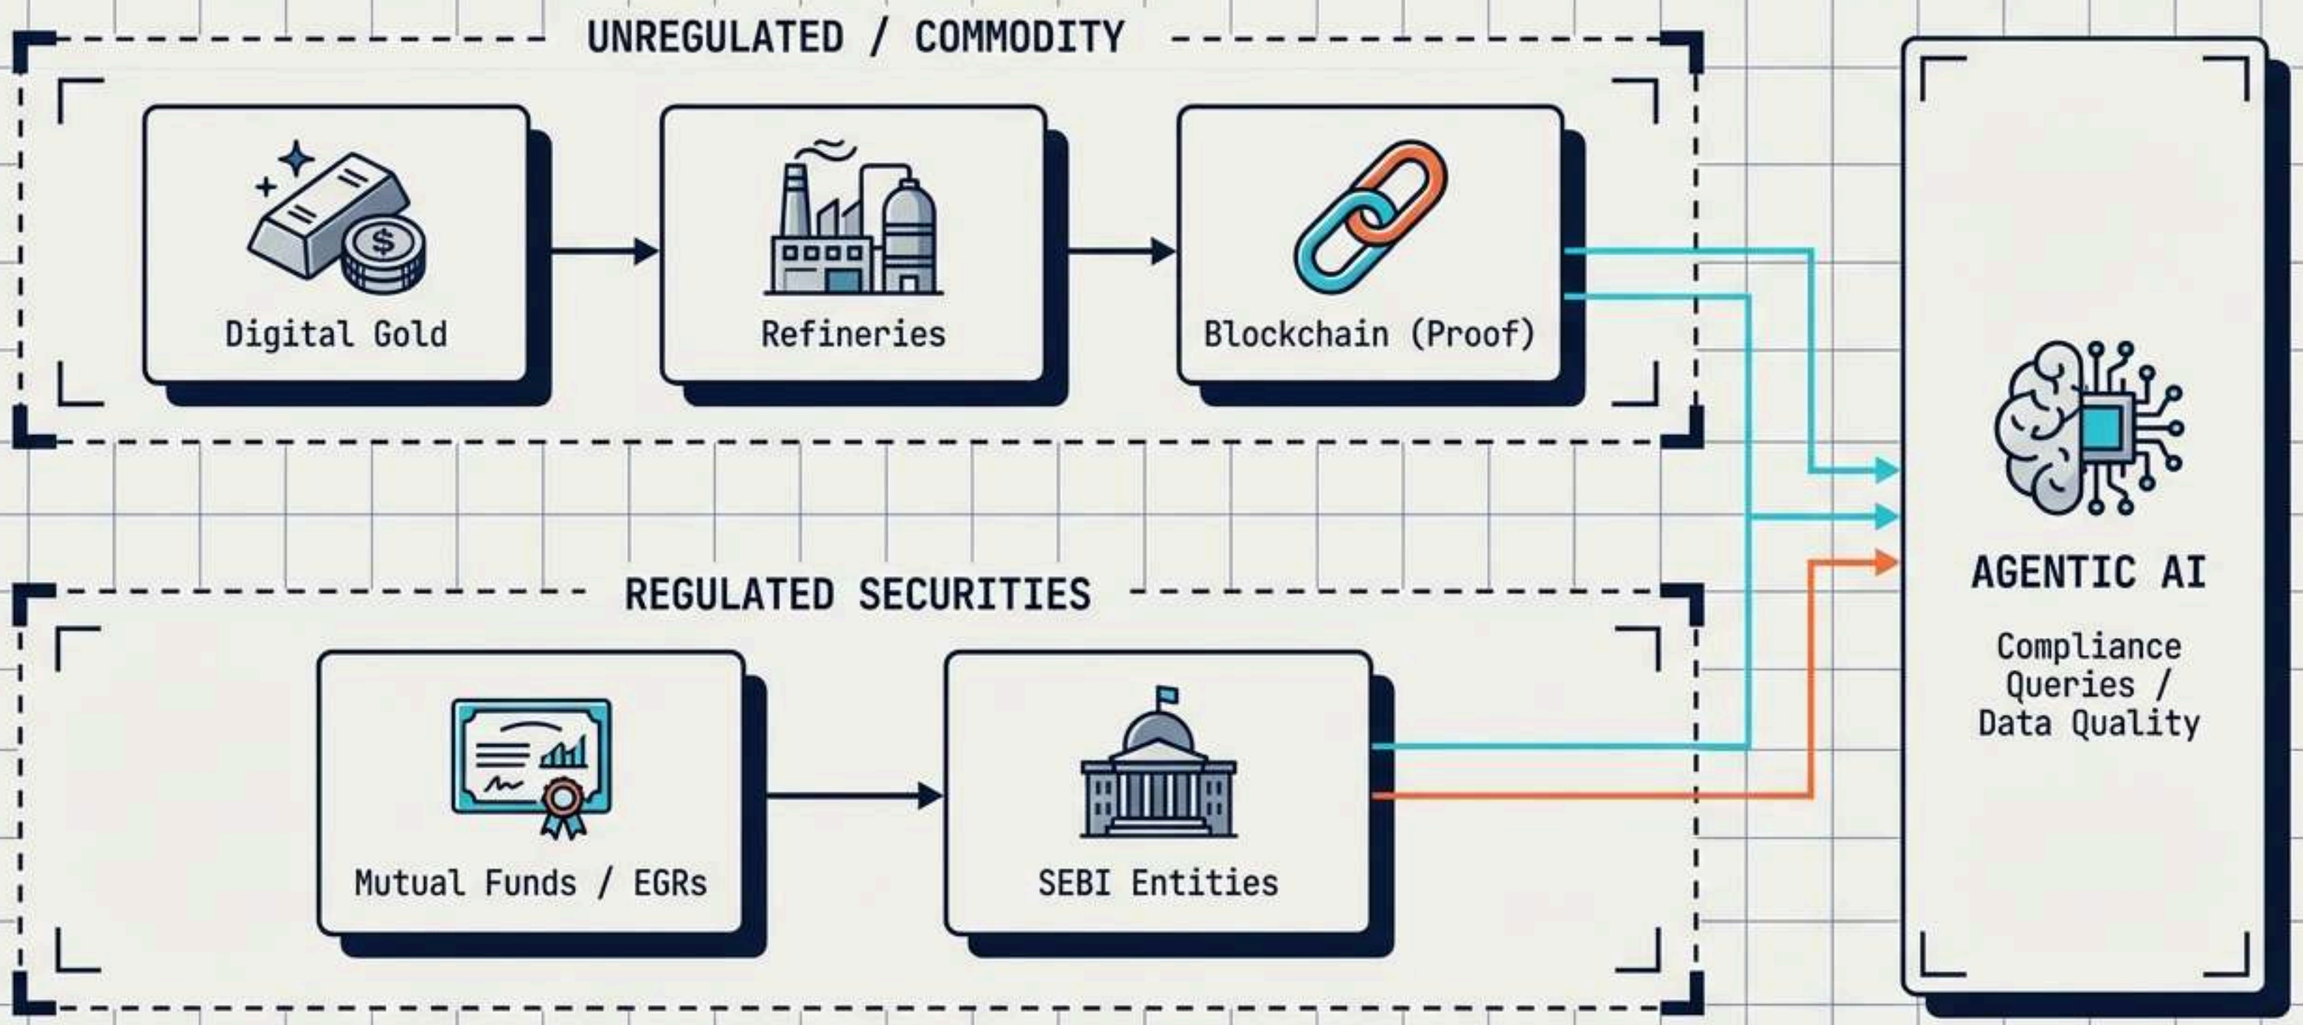
The core business engine is cash-flow positive. Losses are driven by non-cash ESOPs and strategic expansion.

DATE: 2025.05.15

ENGINEERING REVIEW

Jar Explainer Series

FUTURE ROADMAP: THE MULTI-RUNTIME ENVIRONMENT



SYSTEM INTEGRITY: ENTERPRISE SCALE AT CONSUMER SPEED

VELOCITY

Microservices & Stub JARs allowing rapid iteration.

CONSISTENCY

Saga Patterns & Kafka ensuring money/gold sync.

TRUST

Compliance-by-design (KYC/AML) embedded in code.

A sophisticated orchestration of UPI rails, refinery APIs, and regulatory shields, enabling friction-less wealth creation for millions.

FINAL STATUS: A PROVEN MACHINNE

SPEC SHEET

INPUT: 35M Users / <₹150 CAC

PROCESS: Wholesale Arbitrage + Vertical Integration

OUTPUT: ₹208 Cr Revenue / Profitability Achieved

"We operate on massive volumes... sourcing ing at wholesale prices. The difference is the margin." — Nishchay AG, CEO
